🐙 <https://github.com/Yethu-2>

IT student at RMIT University with a specialization in Full-Stack Development and AI Systems. Proficient in architecting scalable applications using Node.js, Java (Spring Boot), and React, supported by a strong foundation in cloud computing and database management. Proven ability to deliver high-quality code in fast-paced, collaborative environments. Seeking to leverage technical expertise to build innovative, AI-driven solutions and support digital transformation within a forward-thinking engineering team.

ACADEMIC PROJECTS

• PROJECT 1

[Github link](#)

LOCATION BASED ATTENDANCE SYSTEM (ANDROID)

- Developed an Android attendance application with location based authentication and geofence-based check-in/out.
- Implemented MVVM with Clean Architecture using repositories, use cases, and dependency injection via Hilt.
- Integrated Firebase Authentication and Firestore with Room database for offline-first data synchronization.
- Built modern UI using Jetpack Compose + Material3 with support for dark/light themes.

• PROJECT 2

[Github link](#)

RENTMATE - PROPERTY RENTAL MANAGEMENT SYSTEM

- Developed a full-stack property rental management platform connecting tenants, landlords, and property managers.
- Implemented a Spring Boot REST API with JWT authentication and role-based access control.
- Built a responsive React frontend using Vite and React Router for property browsing, applications, and lease management.
- Integrated Stripe payment processing for rent and deposit transactions.
- Designed real-time messaging and notifications using WebSocket (STOMP protocol).
- Used PostgreSQL database via Supabase for data persistence and Supabase Storage for file management.

• PROJECT 3

[Github link](#)

PROMPTLY AI CHATBOT GENERATOR

- Developed an AI chatbot generator using large language models running through Ollama.
- Implemented a system that allows users to generate custom AI chatbots from prompts or datasets.
- Built backend logic in Nodejs to manage prompt templates, responses, and conversation flow.
- Implemented an embedded system that allows user to embed the chatbots.

EDUCATION

RMIT University Vietnam
SGS

BACHELOR OF INFORMATION TECHNOLOGY
EXPECTED GRADUATION: 2027

RELEVANT COURSES:

- Algorithms and Analysis
- Further Programming
- Mobile Application Development
- Full Stack development
- Cloud Foundations
- Systems Deployment and Operations
- Programming Internet of Things
- Software Engineering: Process and Tools
- Software Engineering Project Managementx

LANGUES

English – Fluent
Burmese – Native

COMPÉTENCES

Programming Languages

- Java
- Kotlin
- JavaScript
- Python
- SQL

Frameworks / Libraries

- React
- Node.js
- Express
- JavaFX
- Spring boot

Tools & Platforms

- Docker
- Git
- Maven
- Linux
- AWS / Cloud Computing

Databases

- PostgreSQL
- MySQL
- MongoDB
